IMPACTLINE FLOWMETER

Analogue & Digital Measurements have held an association with Sankyo since 1971. We are experienced in the design and implementation of Impactline Flowmeters into a wide variety of processes from Sugar to Iron Ore.

With many installations already to our credit we are happy to discuss your application and offer suitable solutions.

With many Thousands of Impactline Flowmeters in use worldwide, Sankyo's reputation for Reliability is unquestionable with many units in continuous operation for over 30 years.

For more details and specifications call A&DM to arrange a visit with one of our Sales Engineers.

Analogue & Digital Measurements offer servicing and repair to existing Sankyo Impactline Flowmeter installations.
